A section of the roof is supported by a series of vertical wooden posts, creating a covered walkway or balcony area. The building is surrounded by lush greenery, including a tall, dense evergreen tree on the left and various shrubs and vines in the foreground and background. The overall atmosphere is warm and inviting, with sunlight filtering through the trees.

DESIGNED FOR PEOPLE AND PLANET

SUSTAINABILITY WOVEN INTO EVERY DETAIL

Sands End, RIBA's London Building of the Year 2022, is a showcase of sustainable architecture, seamlessly blending with its natural surroundings.

Designed by Mae with circular principles, the venue maximises material use and minimises waste, creating large, airy spaces perfect for corporate and private events. The interconnected spaces around the Courtyard embody both innovation and sustainability.

Thoughtfully crafted with 35% recycled materials and eco-friendly fixings, the building features exposed engineered timber to reduce unnecessary finishes like plasterboard. Specialist bricks, made from construction waste, prevent additional landfill.

Its asymmetric monopitch roof draws natural light while offering views of the treetops and sky, enhancing the serene atmosphere. Natural green-stained wooden walls further compliment this peaceful, nature-inspired design.

Beyond its eco-friendly structure, Sands End is a charity-run venue that supports community well-being. Every event booked helps fund vital local programmes, making a direct impact on the community while contributing to a sustainable future.

Sands End is more than just an event space, it's a venue that nurtures the planet and uplifts the local community, making it the ideal choice for your next event.
